

# Plaksha MediThon 2025

## Join now to innovate Healthcare!

If Engineers, Doctors and Scientists are ready to nucleate healthcare transforming ideas over a single weekend, here is why you should join our upcoming Health-tech Hackathon.

## Real-world Impact Stories

📌 At an MIT Hackathon, a small team built a solution to simplify medication delivery. PillPack later acquired by Amazon.

📌 From a diabetes-focused hackathon in India, a passionate team created Jana Care — acquired by Siemens Healthineers.

📌 The Augmented Infant Resuscitator (AIR), developed in 48 hours at CAMTech/MGH MediThon in Uganda, is now backed by \$1M+ funding and saving newborns.

## Break down silos

## Rapid Prototyping

**Low Cost, Locally Relevant Solutions**

**Post-hackathon Support**

**Expand your Network**

**Who should attend:**

**Engineers**

**University Students**

**Doctors**

**Scientists**

If you do not have the combination team we can help you form one for your idea!!

**Event Details:**

**When: Oct 10–12, 2025 | Three-day long weekend Hackathon**

**Where: Plaksha University, Mohali**

**What: 3-day challenge to build a working prototype**

**Ready to Make a Difference?**

**Scan the QR code and fill the form**

**[Or use this link](#)**

**2** Await our confirmation and team formation support. Each team should be of 3-5 members having at least one medical professional, one engineer and one researcher/scientist.

**3** Bring your passion, ideas, and willingness to collaborate.

Be the spark that ignites lifesaving solutions!!

Looking forward to building the future of healthcare with you.
